

create a presentation or online module focused on phishing attacks:-

- **Phishing Attacks: Recognize, Prevent, and Respond**
- Understanding modern phishing threats
- How to identify suspicious communications
- Best practices for staying secure

Learning Objectives:

- By the end of this training, participants will be able to:
- Define phishing and related attack types
- Identify common phishing indicators
- Recognize phishing attempts across email, SMS, and social media
- Apply safe security practices
- Report suspected phishing incidents

What Is Phishing?

- Phishing is a cyberattack in which attackers impersonate trusted entities to trick individuals into revealing sensitive information, downloading malware, or sending money.
- **Common Targets:**
 - Passwords
 - Banking information
 - Credit card details
 - Personal data
 - Company credentials

Why Phishing Works

- Attackers exploit:
- Trust
- Curiosity
- Fear
- Urgency
- Authority
- **Examples:**
- "Your account will be suspended."
- "You have an unpaid invoice."
- "Claim your prize now!"

Types of Phishing Attacks

- **Email Phishing**
 - Mass emails sent to many recipients.
- **Spear Phishing**
 - Targeted attacks against specific individuals.
- **Whaling**
 - Attacks targeting executives and senior leaders.
- **Smishing**
 - Phishing through text messages.

Anatomy of a Phishing Email

- Look for:
- ✓ Unexpected sender
- ✓ Misspellings and poor grammar
- ✓ Urgent language
- ✓ Suspicious links
- ✓ Unexpected attachments

Best Practices for Prevention

- **Do:**
 - Verify sender identities
 - Hover over links before clicking
 - Use strong passwords
 - Enable multi-factor authentication (MFA)
 - Keep software updated
- **Don't:**
 - Share passwords
 - Open suspicious attachments
 - Act on urgent requests without verification
